CONTENTS OF VOL. 69 Nos 1–6

NUMBER 1—JANUARY
PART A

The motion of non-basal dislocations in ice crystals
By Y. Wei and J. P. Dempsey 1

Temperature dependence of the diffusion coefficient of vacancies in Cu_3Au
By I. Hashimoto and K. Yamamoto 11

Factors affecting stacking fault contrast in transmission electron microscopy. Comparisons with image simulations
By B. Viguier, K. J. Hemker and G. Vanderschaeve 19

Continuum mechanics and thermodynamics in the theory of cracking
By C. Gurney 33

Quasicrystalline and related crystalline phases in rapidly solidified Al–Fe alloys
By D. H. Kim and B. Cantor 45

Tracer correlation factor and atomic displacements due to the collinear interstitialcy mechanism
By P. C. L. Stephenson and C. A. Sholl 57

The energy of arrays of dislocations in an anisotropic half-space
By T. J. Gosling and J. R. Willis 65

Transmission electron microscopy of nanomachined silicon crystals
By K. E. Puttick, L. C. Whitmore, C. L. Chao and A. E. Gee 91

The strain rate sensitivity of the flow stress and the mechanism of deformation of single crystals of $Ni_3(Al\,Hf)B$
By S. S. Ezz and P. B. Hirsch 105

Dislocation configurations in two-phase Ti–Al alloys. III. Mechanisms producing anomalous flow stress dependence on temperature
By M. A. Morris 129

The two-dimensional shift lattice
By R. J. D. Tilley and R. P. Williams 151

The critical stress in a discrete Peierls–Nabarro model
By K. Ohsawa, H. Koizumi, H. O. K. Kirchner and T. Suzuki 171

Analysis of the strained-layer critical thickness concept based on a Peierls–Nabarro model of a threading dislocation
By G. E. Beltz and L. B. Freund 183

Polarity-driven intensity asymmetries in higher-order Laue zone electron diffraction
By R. James 203

Simulation of X-ray reflection topographs from misfit dislocations
By W. Spirkl, B. K. Tanner, C. Whitehouse, S. J. Barnett, A. G. Cullis, A. D. Johnson, A. Keir, B. Usher, G. E. Clark, W. Hagston, C. R. Hogg and B. Lunn 221

PART B

Vibrational, optical and electronic properties of the hydrogenated amorphous germanium–carbon alloy system
By T. P. Drüsedau, A. Annen, B. Schröder and H. Freistedt 1

On the mechanism of photostructural changes in As-based vitreous chalcogenides. Microscopic, dynamic and electronic aspects
By A. V. Kolobov and G. J. Adriaenssens 21

Point defects in the mixed chalcogenides $Bi_2Te_{3-x}X_x$(X=S, Se)
By J. Horák, Z. Starý and J. Votinský 31

On the transition from non-dispersive to dispersive charge transport in the Monte Carlo simulation of disordered systems
By J. M. Casado and J. J. Mejías 39

Magnetic amorphous Co–Gd powders prepared by mechanical alloying
By P. R. Ruuskanen, R. B. Schwarz and J. D. Thompson 47

Kinetics of annealing of dangling bonds in sputtered amorphous silicon and hydrogenated amorphous silicon
By Y. Fujita, M. Yamaguchi and K. Morigaki 57

A superspace description for the morphology of modulated crystals: an explanation for the occurrence of faces (*hklm*)
By M. Kremers, H. Meekes, P. Bennema, K. Balzuweit and M. A. Verheijen 69

Investigation of microstructure of binary alloys with short-range order by computer simulation
By G. Yu 83

Correlated percolation in solid solutions with short-range order
By G. Yu 95

Investigation of the hard magnetic properties of Sm_2Fe_{17} compounds with Ga substitutions
By Z. Wang and R. A. Dunlap 103

Influence of photon beam aperture on Compton line profiles
By R. Sartori and R. T. Mainardi 113

Photo-induced creation of metastable defects in a-Si:H at low temperatures and their effect on the photoconductivity
By P. Stradins and H. Fritzsche 121

Book reviews 141

NUMBER 2—FEBRUARY
PART A

Transmission electron microscopy and high-resolution electron microscopy studies of structural defects induced in 6H α-SiC single crystals irradiated by swift Xe ions
By I. Lhermitte-Sebire, J. Vicens, J. L. Chermant, M. Levalois and E. Paumier 237

Dynamical zone-axis electron diffraction contrast of boron-doped Si multilayers
By C. J. Rossouw, P. Spellward, D. D. Perovic and D. Cherns 255

A study of transverse and longitudinal size effects in high-strength polyethylene fibres
By J. P. Penning, A. A. de Vries, J. Van der Ven, A. J. Pennings and H. W. Hoogstraten 267

Burgers vector determination of decorated dislocations in γ-TiAl by diffraction contrast and large-angle convergent-beam electron diffraction
By J. M. K. Wiezorek, A. R. Preston, S. A. Court, H. L. Fraser and C. J. Humphreys 285

Dislocation nucleation mechanism in nitrogen-doped ZnSe/GaAs
By L. H. Kuo, L. Salamanco-Riba, J. M. DePuydt, H. Cheng and J. Qiu 301

Acoustic harmonic generation from fatigue-induced dislocation dipoles
By J. H. Cantrell and W. T. Yost 315

On the role of non-equilibrium grain-boundary structure in the yield and flow stress of polycrystals
By A. A. Nazarov 327

Shape of hollow dislocation cores
By J. P. Hirth and D. J. Srolovitz 341

Quantification of the spinodal wave in $Cu_{2\cdot5}Mn_{0\cdot5}Al$ by dark-field image analysis
By K. Sato and W. M. Stobbs 349

A model of diffusion-controlled annealing of dislocation loops in pre-amorphized silicon
By C. D. Meekison 379

PART B

Peter LeComber Memorial Issue 145

Deep trapping and recombination in hydrogenated amorphous silicon
By J.-H. Zhou and S. R. Elliott 147

Thermoelectric power of amorphous silicon under illumination
By F. Goesmann and D. I. Jones 159

Nuclear magnetic resonance studies on hydrogenated amorphous silicon prepared by very high-frequency glow discharge
By Q. Li, P. C. Taylor and F. Finger 169

Reversible and irreversible structural changes in amorphous silicon
By G. Müller, G. Krötz, S. Kalbitzer and G. N. Greaves 177

Free-carrier absorption in microcrystalline silicon thin films prepared by very-high-frequency glow discharge
By K. Peter, G. Willeke, K. Prasad, A. Shah and E. Bucher 197

Studies of short-range order in amorphous Ge_xSe_{100-x} compounds by X-ray photoelectron spectroscopy
By Marie-Luce Theye, A. Gheorghiu, C. Senemaud, M. F. Kotkata and K. M. Kandil 209

Potential distribution and interface states in the input stage of an amorphous silicon thin-film transistor
By A. R. Long, M. Chahdi, D. G. Rodley, S. Nonomura and P. G. LeComber 223

Metal–semiconductor transition in electroformed chromium/amorphous silicon/vanadium thin-film structures
By J. Hajto, A. J. Snell, J. Hu, A. J. Holmes, A. E. Owen, M. J. Rose and R. A. G. Gibson 237

Polarized electroabsorption effect in hydrogenated amorphous silicon alloys and its implication for band edge mobility
By Y. Tsutsumi, H. Okamoto, K. Hattori and Y. Hamakawa 253

Time-domain measurements of spin relaxation processes of dangling-bond defects in hydrogenated amorphous silicon
By J. Isoya, S. Yamasaki, A. Matsuda and K. Tanaka 263

New features in space-charge-limited-photocurrent transients
By G. Juška, M. Viliunas, O. Klíma, E. Šípek and J. Kočka 277

Kinetics of metastability in doped hydrogenated amorphous silicon
By C. E. Nebel, R. A. Street, W. B. Jackson and N. M. Johnson 291

Defects and hydrogen in amorphous silicon nitride
By J. Robertson 307

Transient and stress effects in amorphous silicon thin-film transistors
By M. Hack, R. Weisfield, H. Steemers, M. J. Thompson, M. F. Willums and P. G. LeComber 327

Photothermal deflection spectroscopy of hydrogenated amorphous silicon at low energies and at low temperatures
By S. Nonomura, T. Nishiwaki and S. Nitta 335

Transport properties of glow-discharge amorphous silicon grown under different deposition conditions
By A. K. Browne, J. M. Marshall, D. M. Goldie and A. R. Hepburn 349

Light-induced metastable changes in amorphous silicon nitride
By H. FRITZSCHE and Y. NAKAYAMA 359

The influence of hydrogen dilution on the optoelectronic and structural properties of hydrogenated amorphous silicon carbide films
By F. DEMICHELIS, G. CROVINI, C. F. PIRRI, E. TRESSO, R. GALLONI, R. RIZZOLI, C. SUMMONTE, F. ZIGNANI, P. RAVA and A. MADAN 377

Effects of thermal annealing on the optoelectronic properties of hydrogenated amorphous germanium
By C. F. O. GRAEFF, M. STUTZMANN and K. EBERHARDT 387

NUMBER 3—MARCH
PART A

Three-dimensional structural modulation in doped $YBa_2Cu_3O_{7-\delta}$
By Y. ZHU and J. M. COWLEY 397

Grain boundary faceting and twinning in complex intermetallic compounds
By D. P. POPE and F. CHU 409

Molecular dynamics study of medium-range order in metallic glasses
By V. A. LIKHACHEV, A. I. MIKHAILIN and L. V. ZHIGILEI 421

Examination of the residual stress field in plastically deformed polycrystalline material
By A. BACZMAŃSKI, K. WIERZBANOWSKI, P. LIPIŃSKI, R. B. HELMHOLDT, G. EKAMBARANATHAN and B. PATHIRAJ 437

Polytypic transformation and gliding behaviour in polycrystalline α-SiC deformed by compression at high temperatures
By M. L. DUVAL-RIVIERE and J. VICENS 451

Image force on a lattice dislocation due to a grain boundary in anisotropic f.c.c. materials
By L. PRIESTER and O. KHALFALLAH 471

Dislocation mobility in ⟨100⟩-oriented NiAl single crystals containing iron and hafnium additions
By M. A. MORRIS, J.-F. PEREZ and R. DAROLIA 485

High-temperature dislocation configurations and their effect on ductilization of Ni–Al single crystals
By M. A. MORRIS, J.-F. PEREZ and R. DAROLIA 507

Structure and deformation behaviour of Ti–Al alloys containing nearly 60 at.% Al
By D. G. MORRIS, S. GÜNTER and M. LEBOEUF 527

Structure and thermal stability of nanocrystalline silver studied by transmission electron microscopy and positron annihilation spectroscopy
By T. KIZUKA, Y. NAKAGAMI, T. OHATA, I. KANAZAWA, H. ICHINOSE, H. MURAKAMI and Y. ISHIDA 551

Anisotropy of grain-boundary diffusional creep in a polycrystalline array with orthorhombic grain geometry
By B. BURTON 565

Grain shrinkage in two-phase systems during tempering
By G. CARTER 583

A positron annihilation study of the formation and dissolution of $L1_2$ precipitates in Al–Li alloys
By J. DEL RÍO, F. PLAZAOLA and N. DE DIEGO 591

Cube plane superdislocation networks in crept polycrystalline Ni_3Al
By T. S. RONG, I. P. JONES and R. E. SMALLMAN 597

The quantitative determination of the degree of ordering of $Ga_{0.51}In_{0.49}P$ using transmission electron microscopy
By C. S. BAXTER and W. M. STOBBS 615

Superstructures of lead niobium oxides. Diffraction experiments and modelling
By C. CARANONI, F. THURIÈS, CH. LEROUX and G. NIHOUL 633

PART B

Correlations in cellular patterns
By M. O. MAGNASCO 397

Average number of sides for the neighbours in a Poisson–Voronoi tesselation
By S. KUMAR, S. K. KURTZ and D. WEAIRE 431

Diagrammatic expansion of a Φ^4 theory and lattice models with local interactions up to eighth order
By Z. GULÁCSI and M. GULÁCSI 437

Modelling of the hysteresis of ferroelectric thin films
By I. K. YOO and S. B. DESU 461

Theory of elementary excitations of the magnetoplasma in semi-infinite n–i–p–i superlattices
By M. S. KUSHWAHA 471

Determination of the reversible relaxation spectrum in metallic glasses
By A. BÖHÖNYEY and L. F. KISS 491

Study of the ferroelastic transformation in zirconia by neutron diffraction
By M. G. CAIN, S. M. BENNINGTON, M. H. LEWIS and S. HULL 499

Optoelectronic properties of polycrystalline silicon produced by low-temperature (600°C) solid-phase crystallization of hydrogenated amorphous silicon
By T. E. DYER, J. M. MARSHALL and J. F. DAVIES 509

Clean grain boundaries in aluminium nitride ceramics densified without additives by a plasma-activated sintering process
By S. H. RISBUD, J. R. GROZA and M. J. KIM 525

The dynamical simulation of superionic UO_2 using shell-model potentials
By P. J. D. LINDAN and M. J. GILLAN..... 535

Book reviews..... 549

NUMBER 4—APRIL
PART A

Large strain deformation of a copper–tungsten composite system. I. Strain distributions
By W. J. POOLE, J. D. EMBURY, S. MACEWEN and U. F. KOCKS..... 645

Large strain deformation of a copper–tungsten composite system. II. Applications
By W. J. POOLE, J. D. EMBURY, S. MACEWEN and U. F. KOCKS..... 667

On the contribution of climb to high-temperature deformation in single phase γ-TiAl
By B. K. KAD and H. L. FRASER..... 689

Planar faults in ordered ternary alloy A_2BC having an orthorhombic structure based on Ti_2AlNb
By A. K. SINGH, T. K. NANDY, D. MUKHERJEE and D. BANERJEE..... 701

Studies of the crystallography of arbitrary grain boundaries by O-lattice construction: application to bulk $YBa_2Cu_3O_{7-\delta}$
By YIMEI ZHU..... 717

Stacking fault structures in melt-processed $YBa_2Cu_3O_{7-\delta}$ superconductors
By J. RINGNALDA, C. J. KIELY, P. FOX, and G. J. TATLOCK..... 729

Plastic deformation of GaAs by ultrasonic treatment
By B. TIPPELT, D. KLIMM and P. PAUFLER..... 741

Formation mechanisms of SISF-bounding dislocations in cold-rolled Ni_3Al
By A. CHIBA and S. HANADA..... 751

Electron microscopy and energy-loss spectroscopy of voidites in pure type IaB diamonds
By W. LUYTEN, G. VAN TENDELOO, P. J. FALLON and G. S. WOODS 767

Strain relaxation by edge dislocations in GaAs/GaAlAs double heterostructures
By D. VIGNAUD and J. DI PERSIO..... 779

Calculated defect formation energies as a function of distance from the BaO/MgO interface compared with image theory predictions
By D. C. SAYLE, S. C. PARKER and J. H. HARDING..... 787

A new regime of dynamic recovery in the high-temperature deformation of semiconductors
By H. SIETHOFF and K. AHLBORN..... 793

Nucleation of trapezoidal kink pairs on a Peierls potential
By H. KOIZUMI, H. O. K. KIRCHNER and T. SUZUKI 805

PART B

The bewildering surface attributes of gallium arsenide. A cathodoluminescence perspective
By S. MYHAJLENKO, D. B. DAVITO, R. A. PUECHNER and J. L. EDWARDS, JR 553

A law of corresponding states for hopping transport in disordered materials
By R. H. YOUNG 577

Light-induced changes of the non-Gaussian $1/f$ noise statistics in doped hydrogenated amorphous silicon
By J. FAN and J. KAKALIOS 595

Photoluminescence in doping-modulated amorphous silicon multilayers
By H. OHEDA 609

Diamond polishing mechanisms: an investigation by scanning tunnelling microscopy
By M. S. COUTO, W. J. P. VAN ENCKEVORT and M. SEAL 621

An HREM study of the ionic conductor strontium lithium β-alumina
By T. T. CHENG, M. AINDOW, J. MAYER and M. RÜHLE 643

Plan-view and profile imaging of sulphided platinum particles
By M. A. GRIBELYUK, P. J. F. HARRIS and J. L. HUTCHISON 655

A new crystalline approximant of the decagonal phase in Al–Mn alloys
By J. J. HU and P. L. RYDER 671

Order–disorder phase transitions in $YBa_2Cu_3O_{6+2c}$: the asymmetric next-nearest-neighbour interaction model revised from a first-principles point of view
By L. UDVARDI, L. SZUNYOGH, J. REDINGER, P. WEINBERGER and A. PASTUREL 683

The electronic properties of liquid transition metals with particular reference to Fe
By G. J. MORGAN and J. M. HOLENDER 697

Structure of the Al–Co–Cu decagonal phase and its crystalline approximants
By S. G. SONG and E. R. RYBA 707

NUMBER 5—MAY
PART A

Tracer diffusion coefficients for the dumb-bell transport mechanism in a concentrated f.c.c. alloy
By D. K. CHATURVEDI and A. R. ALLNATT 821

On the theory of normal grain growth
By N. P. LOUAT and M. S. DUESBERY 841

A TEM *in situ* investigation of dislocation mobility in the II–VI semiconductor compound ZnS. A quantitative study of the cathodoplastic effect
By C. LEVADE, A. FARESS and G. VANDERSCHAEVE 855

High-resolution electron microscopy and X-ray diffraction characterization of alternately strained $(GaAs)_n$ $(GaP)_m$ $(GaAs)_n$ $(InP)_m$ superlattices grown by atomic layer molecular beam epitaxy
By C. BALLESTEROS, D. GERTHSEN, A. MAZUELAS, A. RUIZ and F. BRIONES 871

Microstructural defects induced by implantation of hydrogen in (111) silicon
By M. F. BEAUFORT, H. GAREM and J. LÉPINOUX 881

Plastic deformation, extended stacking faults and deformation twinning in single crystalline indium phosphide. 1. Undoped InP
By M. AZZAZ, J.-P. MICHEL and A. GEORGE 903

Spinodal ordering in the equiatomic AuCu alloy
By Y. TANAKA, K.-I. UDOH, K. HISATSUNE and K. YASUDA 925

Investigations of dislocation mechanisms in Ni_3Al at different temperatures: *in situ* straining experiments in a transmission electron microscope
By G. MOLÉNAT and D. CAILLARD 939

Hardening and strain-ageing by vacancies and their aggregates in FeAl
By D. G. MORRIS, J. C. JOYE and M. LEBOEUF 961

Convergent-beam electron diffraction study of the Burgers vectors of dislocations in icosahedral quasicrystals
By JIANGLIN FENG and RENHUI WANG 981

Cross-slip in the first stages of plastic relaxation in $In_xGa_{1-x}As/GaAs$ heterostructures
By C. ULHAQ-BOUILLET, A. LEFEBVRE and J. DI PERSIO 995

PART B

Special Issue:
Density Functional Theory and its Applications
To Celebrate the 65th Birthday of Norman H. March

Foreword 725

Density functions and density functionals
By R. MCWEENY 727

Aspects of density functional theory
By R. G. PARR 737

The density functional theorem and Hückel theories
By R. G. WOOLLEY 745

Does fulminic acid have a bent equilibrium structure?
By N. C. Handy, C. W. Murray and R. D. Amos 755

Recent constrained-search advances for approximating density functionals
By M. Levy and A. Görling 763

Density functional theory for excited states
By A. K Theophilou 771

Exact and approximate exchange potentials in the density functional theory
By A. Nagy 779

Perturbation and density-gradient expansions in *D* dimensions
By A. Holas and N. H. March 787

Along the Coulson contour
By B. T. Pickup 799

Empirical average of configuration and density functional electronegativities and acid and base hardnesses
By J. Shea and M. A. Whitehead 807

Concerning the relation between the electronegativity of an atom and its ionization energies
By A. F. Orchard 821

Vibrational and elastic properties of the hot solid related to the static and dynamic structure of the liquid within density functional theory
By M. P. Tosi and V. Tozzini 833

Self-interaction correction via the momentum distribution
By D. M. Edwards, S. M. Manning and J. Rettke-Grover 849

Density functional theory of superconductivity
By L. Fritsche 859

Density functional theory and interionic potentials
By N. L. Allan and W. C. Mackrodt 871

The *ab-initio* energetics of oxides
By M. J. Gillan, I. Manassidis and A. De Vita 879

Shear constants using angularly dependent bond order potentials
By P. Alinaghian, S. R. Nishitani and D. G. Pettifor 889

Plasmons and dynamic screening effects in crystals
By B. Farid, G. E. Engel, R. Daling and W. van Haeringen 901

Glass: elementary excitations and geometry; from bonds to tunnelling modes
By N. Rivier 911

Study of *cis–trans* isomerization of polyacetylene induced by doping
By G. M. Lombardo, G. Piccitto and R. Pucci 925

Chemisorption at metal and semiconductor surfaces
By F. Flores, F. J. Garciá-Vidal, J. Ortega and R. Pérez 931

Bonding and dipoles at semiconductor interfaces
By C. C. Matthai 941

Physics and chemistry in high electric fields
By H. J. Kreuzer and R. L. C. Wang 945

Liquid–solid transition in quantal systems
By S. Moroni and G. Senatore 957

A diffraction study of the structure of liquid potassium near freezing and density functional theory of pair potentials
By M. W. Johnson, N. H. March, F. Perrot and A. K. Ray 965

Fermi-liquid description for itinerant-electron magnetism
By S. Misawa 979

Atomic dynamics in confined liquids
By J. G. Powles 989

Exponents in the theory of the soft-X-ray threshold anomaly of Li, Na, Mg, Al, K, Rb and Cs
By Yoshihiro Ohmura and Akinobu Ogiwara 993

Exchange–correlation potential for small atoms
By Jiqiang Chen, R. O. Esquivel and M. J. Stott 1001

On the diagrammatic analysis of electron correlation effects in atoms and molecules: fifth-order energy components
By S. Wilson 1011

The calculation of molecular spectra using finite-element methods
By J. R. Henderson, J. Tennyson and B. T. Sutcliffe 1027

Density functional calculation of the photoabsorption spectrum of simple metal clusters: beyond the local-density approximation and jellium model
By J. A. Alonso, A. Rubio and L. C. Balbas 1037

Atomic structure of metallic clusters of large size
By Qiang Wang, M. D. Glossman, M. P. Iñiguez and J. A. Alonso 1045

The cylindrical electric double layer in the modified Poisson–Boltzmann theory
By L. B. Bhuiyan and C. W. Outhwaite 1051

Many-electron effects in the magnetoresistivity of a non-degenerate two-dimensional electron gas
By M. J. Lea and M. I. Dykman 1059

Hartree–Fock equations determining the optimum set of spin orbitals for the expansion of excited states
By N. Gidopoulos and A. Theophilou 1067

NUMBER 1—JUNE
PART A

Effect of Cd on superplastic flow in the Pb–62 wt% Sn eutectic
By SOUPING YAN, JAMES C. EARTHMAN and FARGHALLI A. MOHAMED 1017

Hydrogen diffusion in plastically deformed Ni_3Fe alloys
By E. H. BÜCHLER, M. HIRSCHER and H. KRONMÜLLER..... 1039

Nucleation of twins by grain coalescence during the sintering of $BaTiO_3$ ceramics
By G. KÄSTNER, R. WAGNER and V. HILARIUS..... 1051

***In-situ* measurements of the lattice parameter of supported palladium clusters**
C. GOYHENEX, C. R. HENRY and J. URBAN..... 1073

The generalized Peierls–Nabarro model
By G. SCHOECK..... 1085

The threshold stress for creep controlled by dislocation–particle interaction
By R. S. MISHRA, T. K. NANDY and G. W. GREENWOOD 1097

Temperature dependence of strain-rate sensitivity, work hardening and dislocation structure in Ni_3Al single crystals
By K. JUMONJI, S. UETA, M. KATO and A. SATO..... 1111

Octahedral multiple-twin model of tetrapod ZnO crystals
By S. TAKEUCHI, H. IWANAGA and M. FUJII..... 1125

Elastic analysis of triangular pyramidal indentation by the finite-element method and its application to nano-indentation measurement of glasses
By YUKITAKA MURAKAMI, KOHICHI TANAKA, MASAYA ITOKAZU and ATSUSHI SHIMAMOTO 1131

Dislocation structures in β-brass deformed cyclically at 200°C
By H. SAKA and YIMEI ZHU 1155

Low-temperature deformation of single crystals of a $D0_{19}$ compound with an off-stoichiometric composition (Ti–36·5 at.% Al)
By H. INUI, Y. TODA, Y. SHIRAI and M. YAMAGUCHI..... 1161

Observation of minute strain fields in a floating-zone-grown silicon crystal containing D defects by means of plane-wave X-ray topography
By SHIGERU KIMURA, TETSUYA ISHIKAWA and JUNJI MATSUI..... 1179

PART B

Electrical resisitivity of liquid copper–silver alloys
By S. SAADEDDINE and J. G. GASSER..... 1075

Lowered interdiffusivity in thin amorphous Ni–Zr films with large composition gradients
By J. BØTTIGER, N. G. CHECHENIN, A. L. GREER, N. KARPE, J. P. KROG and K. KYLLESBECH LARSEN..... 1083

Characteristics of an $Al_{0.3}Ga_{0.7}As$-doped GaAs triangular barrier switch
By K. F. YARN 1093

Study of low-resistivity oxides on Pt/MgO
By P. TIWARI, X. D. WU, S. R. FOLTYN, M. Q. LEE, I. H. CAMPBELL, R. C. DYE, R. E. MUENCHAUSEN, J. F. SMITH and T. E. MITCHELL 1101

Loss tangent distribution function: applications to metals and polymers
By F. POVOLO and C. L. MATTEO 1111

Properties of tetrahedral amorphous carbon films deposited in a filtered cathodic arc in the presence of hydrogen
By C. A. DAVIS, V. S. VEERASAMY, G. A. J. AMARATUNGA, W. I. MILNE and D. R. MCKENZIE 1121

Substitutional nitrogen doping of tetrahedral amorphous carbon
By C. A. DAVIS, D. R. MCKENZIE, Y. YIN, E. KRAVTCHINSKAIA, G. A. J. AMARATUNGA and V. S. VEERASAMY 1133

Infrared absorption by the single nitrogen and A defect centres in diamond
By I. KIFLAWI, A. E. MAYER, P. M. SPEAR, J. A. VAN WYK and G. S. WOODS 1141

The relationship between infrared absorption and the A defect concentration in diamond
By S. R. BOYD, I. KIFLAWI and G. S. WOODS 1149

Ion implantation in conjugated polymers: mechanisms for generation of charge carriers
By A. MOLITON, B. LUCAS, C. MOREAU, R. H. FRIEND and B. FRANÇOIS 1155

Diffuse neutron-scattering study of deuterated ice Ih
By J. C. LI, V. M. NIELD, D. K. ROSS, R. W. WHITWORTH, C. C. WILSON and D. A. KEEN 1173

Phonon spectra, interatomic interaction potentials and simulation of lattice defects in iridium and rhodium
By A. S. IVANOV, M. I. KATSNELSON, A. G. MIKHIN, YU. N. OSETSKII, A. YU. RUMYANTSEV, A. V. TREFILOV, YU. F. SHAMANAEV and L. I. YAKOVENKOVA 1183

Phonon–phonon interaction and phonon drag in potassium at low temperatures
By M. OMINI 1197

Subject index 1217

Index of authors 1225
